Steel, chipboard, silicone mould,
disco ball motor, mechanical “Breathing” mechanism
95 x 130 x 40 cm

A silicone cast is taken directly from the sidewalk in Frankfurt’s new Europaviertel development. From this a positive cast is made which transfers dirt from the original site. It is draped like a fabric across a custom made coffee table which contains a mechanism to make the silicone “breathe”.

FASSADEN

Group exhibition curated by Paula Kommos,
Elvira Galerie, Frankfurt am Main.

Installation view with film from Judith Hopf
